

What is 50G Ethernet?

TI Precision Labs – Ethernet

Prepared and presented by Lucas Wolter

What is 50G Ethernet?

- Defined by IEEE 802.3cd standard.
 - Approved in December 2018.
 - IEEE:** Institute of Electrical and Electronic Engineers.
 - IEEE 802.3:** Set of standards which define wired Ethernet networks.
 - IEEE 802.3cd:** Consists of Clauses 131 – 140 and Annexes 135A – 136D.

Comparison: 25G vs. 50G Ethernet

	25G Ethernet	50G Ethernet
Modulation	NRZ (Non-Return-to-Zero)	PAM-4 (Pulse Amplitude Modulation with 4 levels)
Encoding scheme	64b/66b	256b/257b x RS-FEC(544, 514) (Reed-Solomon Forward Error Correction)
Bit rate (Gbps)	25.78125 ¹	53.125 ²
Baud rate (GBd)	25.78125	26.5625

$$^1 (25 \text{ Gbps}) * (66 \text{ b} / 64 \text{ b}) = 25.78125 \text{ Gbps}$$

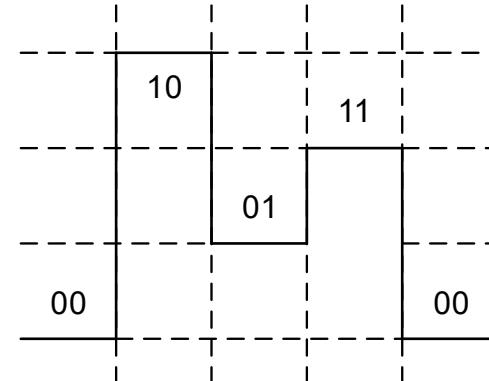

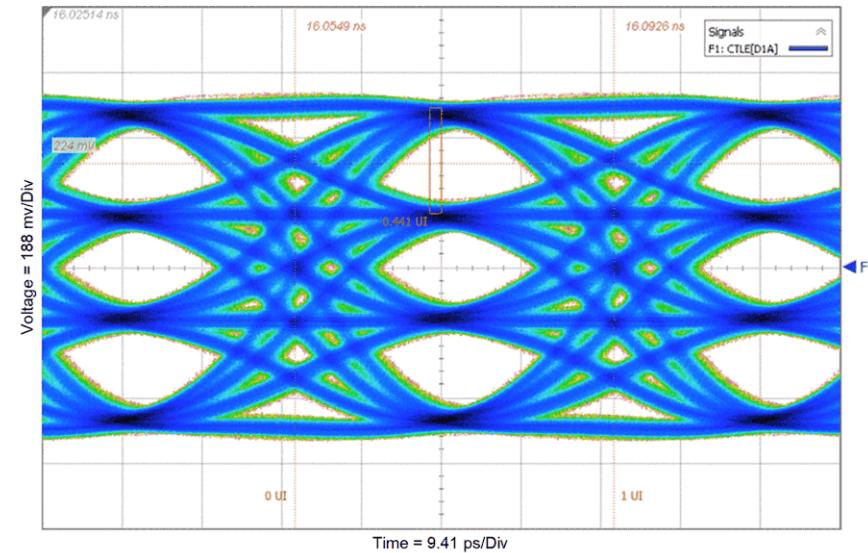

$$^2 (50 \text{ Gbps}) * (257 \text{ b} / 256 \text{ b}) * (544 / 514) = 53.125 \text{ Gbps}$$

Comparison: NRZ vs. PAM-4 modulation

NRZ

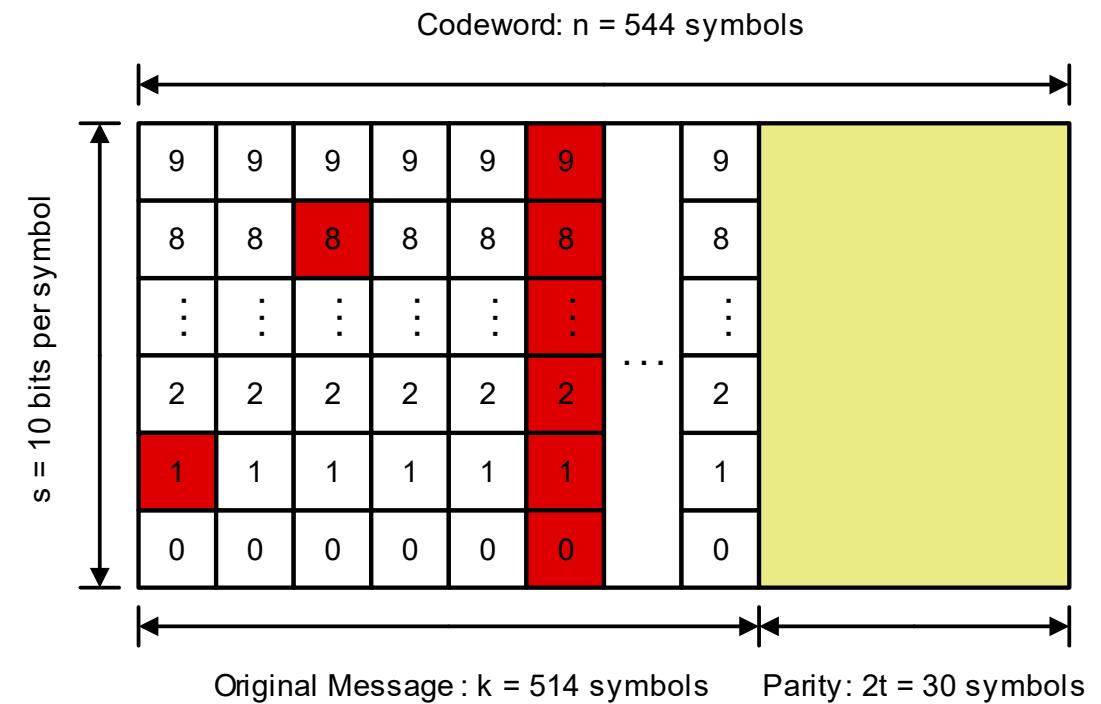

PAM-4 with Graycoding

Reed-Solomon Forward Error Correction (RS-FEC)

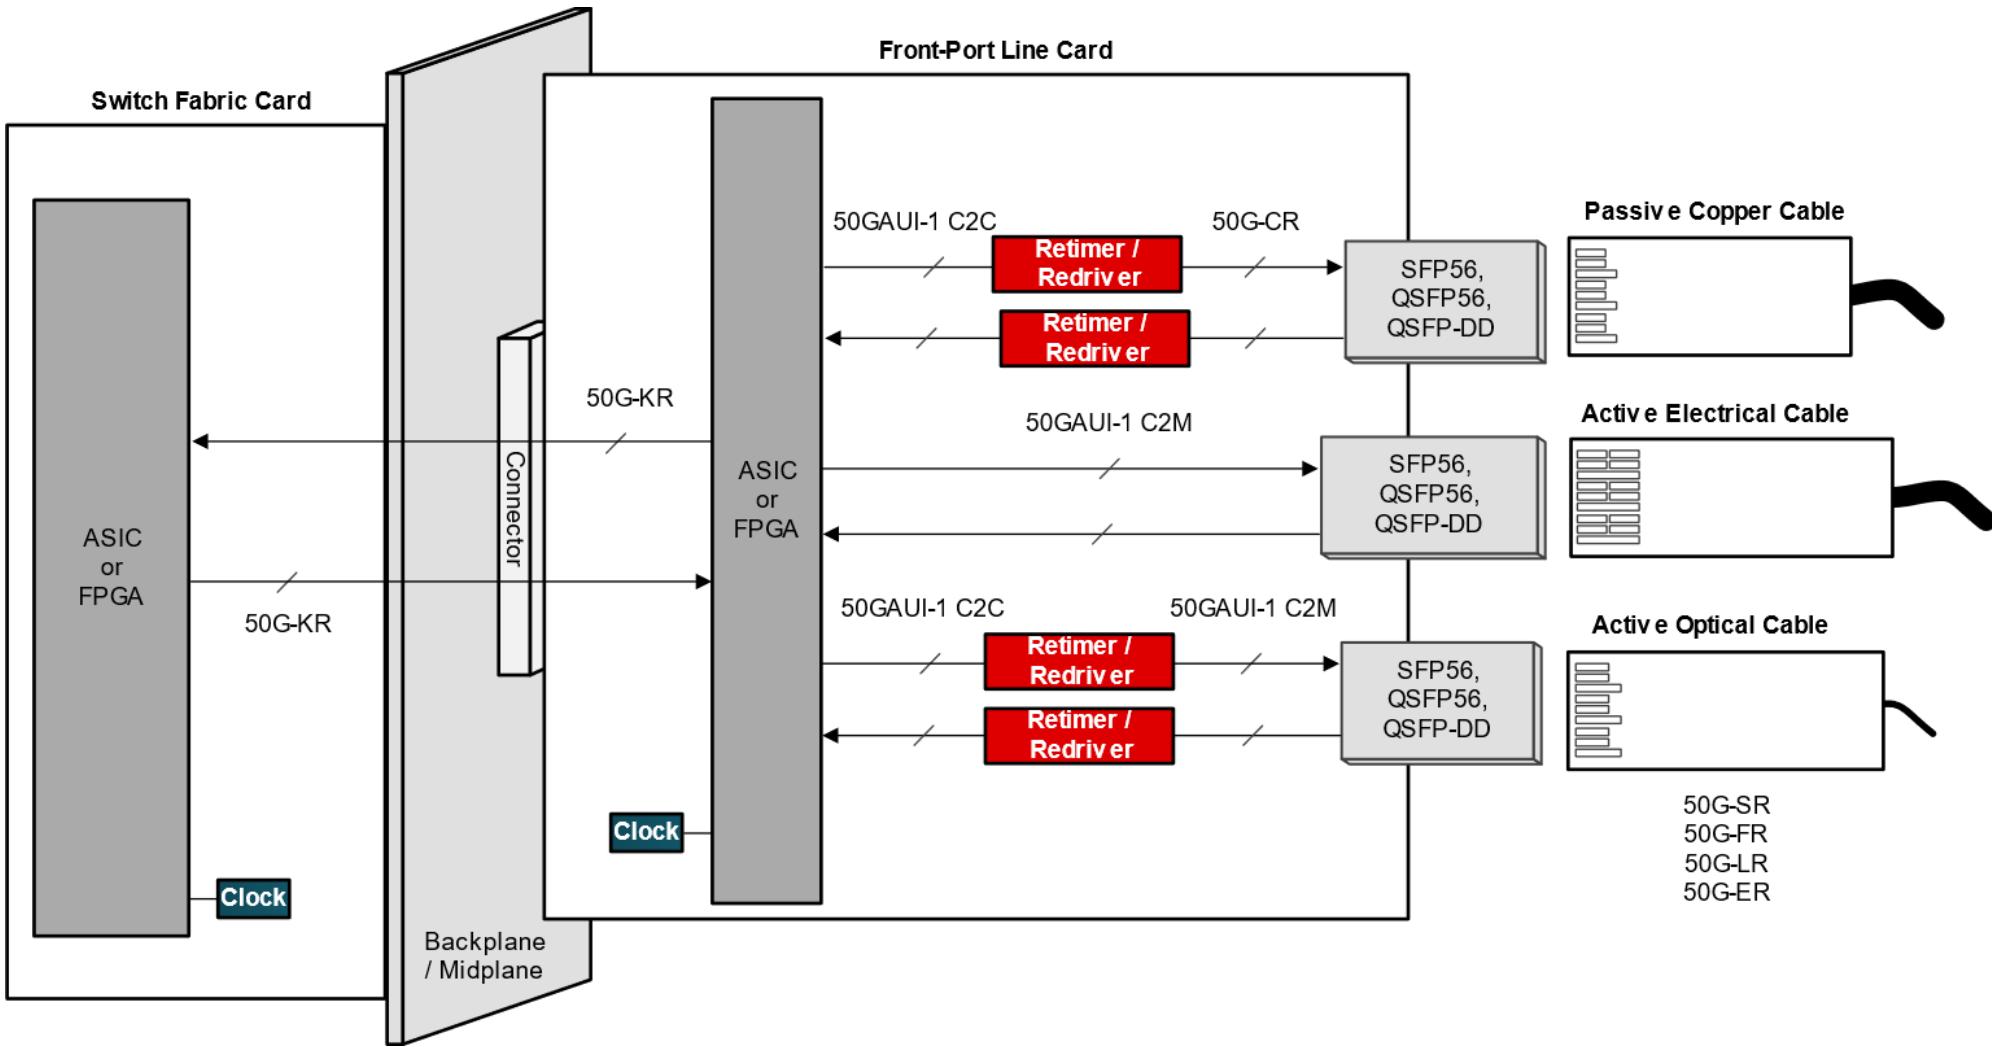

- Notation: RS-FEC(n , k)
 - The number of parity symbols is $2t = n - k$.
 - t symbol errors can be corrected per codeword.
 - A symbol error occurs if 1 bit or all s bits are corrupted.
- In 50G Ethernet, $n = 544$, $k = 514$, $s = 10$.
 - $2t = 544 - 514 = 30$
 - 15 symbol errors can be corrected per 544 symbol codeword.

Notable IEEE 802.3cd clauses

- **Clause 135:** 50GBASE-R
 - No specific medium
 - **Clause 136:** 50GBASE-CR
 - Copper cable medium
 - **Clause 137:** 50GBASE-KR
 - Backplane medium
 - **Clause 138:** 50GBASE-SR
 - Multimode fiber medium
 - **Clause 139:** 50GBASE-FR, -LR, -ER
 - Single-mode fiber medium
-
- **Annex 135F:** 50GAUI-1 C2C
 - Chip-to-chip attachment unit interface
 - **Annex 135G:** 50GAUI-1 C2M
 - Chip-to-module attachment unit interface
-
- **Annex 136B:** Test fixtures for 50GBASE-CR and 50GAUI-1 C2M

50G Ethernet application diagram

Short quiz

1. What is the baud rate of 50G Ethernet?
 - a. 25.78125 GBd
 - b. 26.5625 GBd
 - c. 53.125 GBd
2. How many error symbols can be corrected per codeword by RS-FEC(544, 514)?
 - a. 15
 - b. 30
 - c. 514
3. Which IEEE 802.3 clause defines 50G Ethernet with backplane medium?
 - a. 50GAUI-1 C2M
 - b. 50GBASE-CR
 - c. 50GBASE-KR
