Help us keep you safe

TI uses an **Emergency Alert System (EAS)** to inform employees and suppliers in the event of an emergency. Enrolling in this system **will only be used to notify you of an emergency** that could impact your health, safety or security (e.g., severe weather, threat of violence on site, COVID-19)

- Our **TI EAS vendor, xMatters**, uses employee and supplier contact information to send email and text message notifications as an event unfolds.

- As a TI employee or supplier, it is important to securely provide your personal contact information to receive TI EAS notifications to make sure you are informed of emergencies while onsite.

- Personal contact is deleted from xMatters when you leave TI.

Examples of text and email:

TI EMERGENCY ALERT for Dallas sites. A Security event has been reported. Listen for and follow emergency alerts.

TI EMERGENCY ALERT for Dallas sites: Tornado Reported

ⓘ This message was sent with High importance.

TEXAS INSTRUMENTS

TI EMERGENCY ALERT for Dallas sites:

A Tornado has been reported. To ensure your safety, please take the following actions:

If inside -
• Listen for and follow emergency shelter alerts
• DO NOT exit the building
• Stay away from exterior walls, doors or windows

If outside -
• Find immediate shelter
• DO NOT park under an overpass or bridge
• DO NOT attempt to outrun a tornado

Additional instructions may follow.
