*
* Model Usage Notes:
* A. Features have been modelled
*   1. Output Voltage Setting
*   2. Internal Fixed Soft-Start and External Adjustable Soft-start
*   3. Frequency and Operation Mode Selection
*   4. High-side FET Current Limit
*   5. Low-side FET Current Limit
*   6. Low-side FET Sink Current Limit
*   7. Power Good
*   8. Output Voltage Discharge
*   9. UVLO Protection
*
* B. Features have not been modelled
*   1. Operating Quiescent Current
*   2. Shutdown Current
*   3. Temperature dependent characteristics
*
* C. Application Notes
*   1. To run the POP/AC analysis, you must run complete Startup Transient simulation and then run the AC analysis.
*      Also you must choose "Use snapshot from previous transient analysis" in POP Advanced options.
