

LM120QML Series 3-Terminal Negative Regulators

Check for Samples: [LM120QML](#)

FEATURES

- **Preset Output Voltage Error Less Than $\pm 3\%$**
- **Preset Current Limit**
- **Internal Thermal Shutdown**
- **Operates with Input-Output Voltage Differential Down to 1V**
- **Excellent Ripple Rejection**
- **Low Temperature Drift**
- **Easily Adjustable to Higher Output Voltage**

DESCRIPTION

The LM120 series are three-terminal negative regulators with a fixed output voltage of $-5V$, $-12V$, and $-15V$, and up to 1.5A load current capability. Where other voltages are required, the LM137 and LM137HV series provide an output voltage range of $-1.2V$ to $-47V$.

The LM120 needs only one external component—a compensation capacitor at the output, making them easy to apply. Worst case specifies on output voltage deviation due to any combination of line, load or temperature variation assure satisfactory system operation.

Exceptional effort has been made to make the LM120 Series immune to overload conditions. The regulators have current limiting which is independent of temperature, combined with thermal overload protection. Internal current limiting protects against momentary faults while thermal shutdown prevents junction temperatures from exceeding safe limits during prolonged overloads.

Although primarily intended for fixed output voltage applications, the LM120 Series may be programmed for higher output voltages with a simple resistive divider. The low quiescent drain current of the devices allows this technique to be used with good regulation.

Table 1. LM120 Series Packages and Power Capability

Package	Rated Power Dissipation	Design Load Current
TO (K)	20W	1.5A
PFM (H)	2W	0.5A

Please be aware that an important notice concerning availability, standard warranty, and use in critical applications of Texas Instruments semiconductor products and disclaimers thereto appears at the end of this data sheet.

These devices have limited built-in ESD protection. The leads should be shorted together or the device placed in conductive foam during storage or handling to prevent electrostatic damage to the MOS gates.

ABSOLUTE MAXIMUM RATINGS⁽¹⁾

		LM120-5	LM120-12	LM120-15
Power Dissipation		Internally Limited		
Input Voltage		-25V	-35V	-40V
Input-Output Voltage Differential		25V	30V	30V
Junction Temperatures		150°C		
Storage Temperature Range		-65°C ≤ T _A ≤ +150°C		
Operating Temperature Range		-55°C ≤ T _A ≤ +125°C		
Lead Temperature (Soldering, 10 sec.)		300°C		
Thermal Resistance	θ _{JA}	PFM-Pkg (Still Air @ 0.5W)		191°C/W
		PFM-Pkg (500LF/Min Air flow @ 0.5W)		70°C/W
		TO-Pkg (Still Air @ 0.5W)		35°C/W
		TO-Pkg (500LF/Min Air flow @ 0.5W)		TBD
	θ _{JC}	PFM-Pkg		29°C/W
		TO-Pkg		3°C/W
ESD Tolerance ⁽²⁾		4000V		

- (1) Absolute Maximum Ratings indicate limits beyond which damage to the device may occur. Operating Ratings indicate conditions for which the device is functional, but do not ensure specific performance limits. For ensured specifications and test conditions, see the Electrical Characteristics. The ensured specifications apply only for the test conditions listed. Some performance characteristics may degrade when the device is not operated under the listed test conditions.
- (2) Human body model, 1.5 kΩ in series with 100 pF.

Short Circuit Current

Figure 15.

TYPICAL APPLICATIONS

Load and line regulation — 0.01% temperature stability — 0.2%

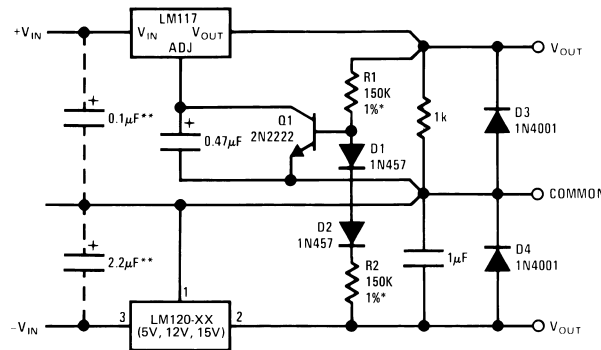

†Determines Zener current.

††Solid tantalum.

An LM120-12 or LM120-15 may be used to permit higher input voltages, but the regulated output voltage must be at least -15V when using the LM120-12 and -18V for the LM120-15.

**Select resistors to set output voltage. 2 ppm/°C tracking suggested.

Figure 16. High Stability 1 Amp Regulator

* Resistor tolerance of R1 and R2 determine matching of (+) and (-) inputs.

**Necessary only if raw supply capacitors are more than 3" from regulators

An LM3086N array may substitute for Q1, D1 and D2 for better stability and tracking. In the array diode transistors Q5 and Q4 (in parallel) make up D2; similarly, Q1 and Q2 become D1 and Q3 replaces the 2N2222.

Figure 17. Wide Range Tracking Regulator

Figure 18. Current Source

*Optional. Improves transient response and ripple rejection.

$$V_{OUT} = V_{SET} \frac{R1 + R2}{R2}$$

SELECT R2 AS FOLLOWS:

LM120-5	-300Ω
LM120-12	-750Ω
LM120-15	-1k

Figure 19. Variable Output

*Lamp brightness increases until $i_l = 5V/R1$ (i_l can be set as low as $1 \mu A$).
 †Necessary only if raw supply filter capacitor is more than 2" from LM320MP.

*Lamp brightness increases until $i_l = i_Q + 5V/R1$.
 †Necessary only if raw supply filter capacitor is more than 2" from LM320.

Figure 20. Light Controllers Using Silicon Photo Cells

Figure 21. Dual Trimmed Supply

*Required if regulator is separated from filter capacitor by more than 3". For value given, capacitor must be solid tantalum. $25 \mu F$ aluminum electrolytic may be substituted.

†Required for stability. For value given, capacitor must be solid tantalum. $25 \mu F$ aluminum electrolytic may be substituted. Values given may be increased without limit.

For output capacitance in excess of $100 \mu F$, a high current diode from input to output (1N4001, etc.) will protect the regulator from momentary input shorts.

Figure 22. Fixed Regulator

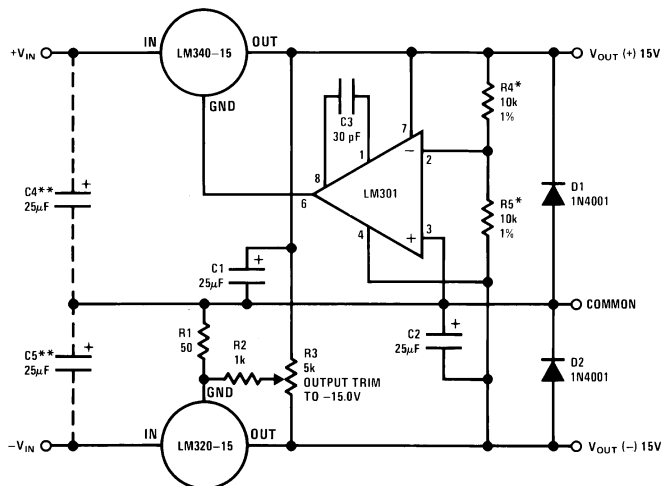

Figure 23. ±15V, 1 Amp Tracking Regulators

Table 3. Performance (Typical)⁽¹⁾

Load Regulation at $\Delta I_L = 1A$	10 mV	1 mV
Output Ripple, $C_{IN} = 3000 \mu F$, $I_L = 1A$	100 $\mu VRMS$	100 $\mu VRMS$
Temperature Stability	+50 mV	+50 mV
Output Noise 10 Hz $\leq f \leq$ 10 kHz	150 $\mu VRMS$	150 $\mu VRMS$

- (1) *Resistor tolerance of R4 and R5 determine matching of (+) and (-) outputs.
 **Necessary only if raw supply filter capacitors are more than 2" from regulators.

REVISION HISTORY

Date Released	Revision	Section	Changes
12/15/2010	A	New release to the corporate format	6 MDS datasheets were converted and merged into one datasheet compliant to corporate format. Drift endpoints removed since note used on 883 product. MDS MNLM120-5.0-K Rev OBL, MNLM120-5.0-H Rev OBL, MNLM120-12-K Rev OBL, MNLM120-12-H Rev OBL, MNLM120-15-K Rev OBL, & MNLM120-15-H Rev OBL will be archived.
4/22/2013	A	All	Changed layout of National Data Sheet to TI format.

(1) The marketing status values are defined as follows:

ACTIVE: Product device recommended for new designs.

LIFEBUY: TI has announced that the device will be discontinued, and a lifetime-buy period is in effect.

NRND: Not recommended for new designs. Device is in production to support existing customers, but TI does not recommend using this part in a new design.

PREVIEW: Device has been announced but is not in production. Samples may or may not be available.

OBSELETE: TI has discontinued the production of the device.

(2) **RoHS:** TI defines "RoHS" to mean semiconductor products that are compliant with the current EU RoHS requirements for all 10 RoHS substances, including the requirement that RoHS substance do not exceed 0.1% by weight in homogeneous materials. Where designed to be soldered at high temperatures, "RoHS" products are suitable for use in specified lead-free processes. TI may reference these types of products as "Pb-Free".

RoHS Exempt: TI defines "RoHS Exempt" to mean products that contain lead but are compliant with EU RoHS pursuant to a specific EU RoHS exemption.

Green: TI defines "Green" to mean the content of Chlorine (Cl) and Bromine (Br) based flame retardants meet JS709B low halogen requirements of ≤ 1000 ppm threshold. Antimony trioxide based flame retardants must also meet the ≤ 1000 ppm threshold requirement.

(3) MSL, Peak Temp. - The Moisture Sensitivity Level rating according to the JEDEC industry standard classifications, and peak solder temperature.

(4) There may be additional marking, which relates to the logo, the lot trace code information, or the environmental category on the device.

(5) Multiple Device Markings will be inside parentheses. Only one Device Marking contained in parentheses and separated by a "~" will appear on a device. If a line is indented then it is a continuation of the previous line and the two combined represent the entire Device Marking for that device.

(6) Lead finish/Ball material - Orderable Devices may have multiple material finish options. Finish options are separated by a vertical ruled line. Lead finish/Ball material values may wrap to two lines if the finish value exceeds the maximum column width.

Important Information and Disclaimer: The information provided on this page represents TI's knowledge and belief as of the date that it is provided. TI bases its knowledge and belief on information provided by third parties, and makes no representation or warranty as to the accuracy of such information. Efforts are underway to better integrate information from third parties. TI has taken and continues to take reasonable steps to provide representative and accurate information but may not have conducted destructive testing or chemical analysis on incoming materials and chemicals. TI and TI suppliers consider certain information to be proprietary, and thus CAS numbers and other limited information may not be available for release.

In no event shall TI's liability arising out of such information exceed the total purchase price of the TI part(s) at issue in this document sold by TI to Customer on an annual basis.

TI PROVIDES TECHNICAL AND RELIABILITY DATA (INCLUDING DATA SHEETS), DESIGN RESOURCES (INCLUDING REFERENCE DESIGNS), APPLICATION OR OTHER DESIGN ADVICE, WEB TOOLS, SAFETY INFORMATION, AND OTHER RESOURCES "AS IS" AND WITH ALL FAULTS, AND DISCLAIMS ALL WARRANTIES, EXPRESS AND IMPLIED, INCLUDING WITHOUT LIMITATION ANY IMPLIED WARRANTIES OF MERCHANTABILITY, FITNESS FOR A PARTICULAR PURPOSE OR NON-INFRINGEMENT OF THIRD PARTY INTELLECTUAL PROPERTY RIGHTS.

These resources are intended for skilled developers designing with TI products. You are solely responsible for (1) selecting the appropriate TI products for your application, (2) designing, validating and testing your application, and (3) ensuring your application meets applicable standards, and any other safety, security, regulatory or other requirements.

These resources are subject to change without notice. TI grants you permission to use these resources only for development of an application that uses the TI products described in the resource. Other reproduction and display of these resources is prohibited. No license is granted to any other TI intellectual property right or to any third party intellectual property right. TI disclaims responsibility for, and you will fully indemnify TI and its representatives against, any claims, damages, costs, losses, and liabilities arising out of your use of these resources.

TI's products are provided subject to [TI's Terms of Sale](#) or other applicable terms available either on [ti.com](https://www.ti.com) or provided in conjunction with such TI products. TI's provision of these resources does not expand or otherwise alter TI's applicable warranties or warranty disclaimers for TI products.

TI objects to and rejects any additional or different terms you may have proposed.
