

# TWL6032 Fully Integrated Power Management with Power Path and Battery Charger

## 1 Device Overview

### 1.1 Features

- Five Highly Efficient Buck Converters
  - One 3 MHz, 0.6 to 2.1 V at 5.0 A, DVS-Capable
  - One 6 MHz, 0.6 to 2.1 V at 2.5 A, DVS-Capable
  - Three 6 MHz, 0.6 to 2.1 V at 1.1 A, One Is DVS-Capable
  - Extended Mode for Higher Output Voltages
- 11 General-Purpose Low-Dropout Voltage Regulators (LDOs)
  - Six 1.0 to 3.3 V at 0.2 A With Battery or Preregulated Supply:
    - One Can be Used as Vibrator Driver
    - One 1.0 to 3.3 V at 50 mA With Battery or Preregulated Supply
    - One Low-Noise 1.0 to 3.3 V at 50 mA With Battery or Preregulated Supply
    - One 3.3 V at 100 mA USB LDO
    - Two LDOs for TWL6032 Internal Use
- USB OTG Module:
  - ID Detection, Accessory Charger Adapter (ACA) Support
  - Accessory Detection Protocol (ADP) Support
- Backup Battery Charger
- 12-Bit Sigma-Delta Analog-to-Digital Converter (ADC) With 19 Input Channels:
  - Seven External Input Channels
- 13-Bit Coulomb Counter With Four Programmable Integration Periods
- Low-Power Consumption:
  - 8  $\mu$ A in BACKUP State
  - 20  $\mu$ A in WAIT-ON State
  - 110  $\mu$ A in SLEEP State, With Two DC-DC Converters Active
- Real-Time Clock (RTC) With Timer and Alarm Wake-Up:
  - Three Buffered 32-kHz Outputs
- SIM and SD/MMC Card Detections
- Two Digital PWM Outputs
- Thermal Monitoring:
  - High-Temperature Warning
  - Thermal Shutdown
- Control:
  - Configurable Power-Up and Power-Down Sequences (OTP Memory)
  - Configurable Sequences Between SLEEP and ACTIVE States (OTP Memory)
  - Three Digital Output Signals that can be Included in the Startup Sequence to Control External Devices
  - Two Inter-Integrated Circuit (I<sup>2</sup>C) Interfaces
  - All Resources Configurable by I<sup>2</sup>C
- System Voltage Regulator and Battery Charger With Power Path From USB:
  - Input Current Limit to Comply With USB Standard
  - 3-MHz Switched-Mode Regulator With Integrated Power FET for up to 2.0-A Current
  - Dedicated Control Loop for Battery Current and Voltage
  - External Low-Ohmic FET for Power Path and Battery Charging
  - Boost Mode Operation for USB OTG
  - Supplement Mode to Deliver Current From Battery During Power Path Operation
  - Charger for Single-Cell Li-Ion and Li-Polymer Battery Packs
  - Safety Timer and Reset Control
  - Thermal Protection
  - Input/Output Overvoltage Protection
  - Charging Indicator LED Driver
  - Compliant With:
    - USB 2.0
    - OTG and EH 2.0
    - USB Battery Charging 1.2
    - YD/T 1591-2006
    - Japanese Battery Charging Guidelines (JEITA)
- Battery Voltage Range From 2.5 to 5.5 V
- Package 5.21-mm  $\times$  5.36-mm 155-Pin WCSP

## 1.2 Applications

- Mobile Phones and Smart Phones
- Tablets
- Gaming Handsets
- Portable Media Players
- Portable Navigation Systems
- Handheld Devices

## 1.3 Description

The TWL6032 device is an integrated power-management integrated circuit (PMIC) for applications powered by a rechargeable battery. The device provides five configurable step-down converters with a current capability of up to 5.0 A for memory, processor core, I/O, auxiliary, preregulation for LDOs, and so forth. The device also contains nine LDO regulators for external use that can be supplied from a battery or a preregulated supply. The power-up and power-down controller is configurable and can support any power-up or power-down sequence (programmed in OTP memory). The RTC provides three 32-kHz clock outputs: seconds, minutes, hours, day, month, and year information; as well as alarm wakeup and timer. The TWL6032 device supports 32-kHz clock generation based on a crystal oscillator.

The device integrates a switched-mode system supply regulator from a USB connector. The switched-mode regulator includes power paths from the USB and battery with supplemental mode for immediate startup, even with an empty battery. The battery switch uses an external low-ohmic PMOS transistor allowing minimal serial resistance during fast charging and when operating from battery. The device can also be used without the external PMOS transistor; in this case, the battery is always tied to the system supply and the switched-mode regulator is used for battery charging.

The TWL6032 device is available in a 155-pin WCSP package, 5.21 mm × 5.36 mm with a 0.4-mm ball pitch.

Figure 1-1 shows the TWL6032 device block diagram.

**Table 1-1. Device Information<sup>(1)</sup>**

PART NUMBER	PACKAGE	BODY SIZE
TWL6032A1Bx	YFF (155)	5.21 mm × 5.36 mm
TWL6032A2Bx	YFF (155)	5.21 mm × 5.36 mm

### 3 Mechanical Packaging and Orderable Information

#### 3.1 Packaging Information

The following pages include mechanical packaging and orderable information. This information is the most current data available for the designated devices. This data is subject to change without notice and revision of this document. For browser-based versions of this data sheet, refer to the left-hand navigation.

**PACKAGING INFORMATION**

Orderable Device	Status (1)	Package Type	Package Drawing	Pins	Package Qty	Eco Plan (2)	Lead finish/ Ball material (6)	MSL Peak Temp (3)	Op Temp (°C)	Device Marking (4/5)	Samples

(1) The marketing status values are defined as follows:

**ACTIVE:** Product device recommended for new designs.

**LIFEBUY:** TI has announced that the device will be discontinued, and a lifetime-buy period is in effect.

**NRND:** Not recommended for new designs. Device is in production to support existing customers, but TI does not recommend using this part in a new design.

**PREVIEW:** Device has been announced but is not in production. Samples may or may not be available.

**OBSOLETE:** TI has discontinued the production of the device.

(2) **RoHS:** TI defines "RoHS" to mean semiconductor products that are compliant with the current EU RoHS requirements for all 10 RoHS substances, including the requirement that RoHS substance do not exceed 0.1% by weight in homogeneous materials. Where designed to be soldered at high temperatures, "RoHS" products are suitable for use in specified lead-free processes. TI may reference these types of products as "Pb-Free".

**RoHS Exempt:** TI defines "RoHS Exempt" to mean products that contain lead but are compliant with EU RoHS pursuant to a specific EU RoHS exemption.

**Green:** TI defines "Green" to mean the content of Chlorine (Cl) and Bromine (Br) based flame retardants meet JS709B low halogen requirements of <=1000ppm threshold. Antimony trioxide based flame retardants must also meet the <=1000ppm threshold requirement.

(3) MSL, Peak Temp. - The Moisture Sensitivity Level rating according to the JEDEC industry standard classifications, and peak solder temperature.

(4) There may be additional marking, which relates to the logo, the lot trace code information, or the environmental category on the device.

(5) Multiple Device Markings will be inside parentheses. Only one Device Marking contained in parentheses and separated by a "~" will appear on a device. If a line is indented then it is a continuation of the previous line and the two combined represent the entire Device Marking for that device.

<sup>(6)</sup> Lead finish/Ball material - Orderable Devices may have multiple material finish options. Finish options are separated by a vertical ruled line. Lead finish/Ball material values may wrap to two lines if the finish value exceeds the maximum column width.

**Important Information and Disclaimer:** The information provided on this page represents TI's knowledge and belief as of the date that it is provided. TI bases its knowledge and belief on information provided by third parties, and makes no representation or warranty as to the accuracy of such information. Efforts are underway to better integrate information from third parties. TI has taken and continues to take reasonable steps to provide representative and accurate information but may not have conducted destructive testing or chemical analysis on incoming materials and chemicals. TI and TI suppliers consider certain information to be proprietary, and thus CAS numbers and other limited information may not be available for release.

In no event shall TI's liability arising out of such information exceed the total purchase price of the TI part(s) at issue in this document sold by TI to Customer on an annual basis.
