

SAR ADCs for PLC Applications

Increased speed, integration and precision

PLC trends

With machinery in factories becoming faster and more complex it is necessary for the intelligence behind each system to similarly adapt. To support and control next generation machinery, the programmable logic controller (PLC) must be capable of quickly and accurately receiving signals from a large number of inputs connected to a wide variety of sensors or subsystems.

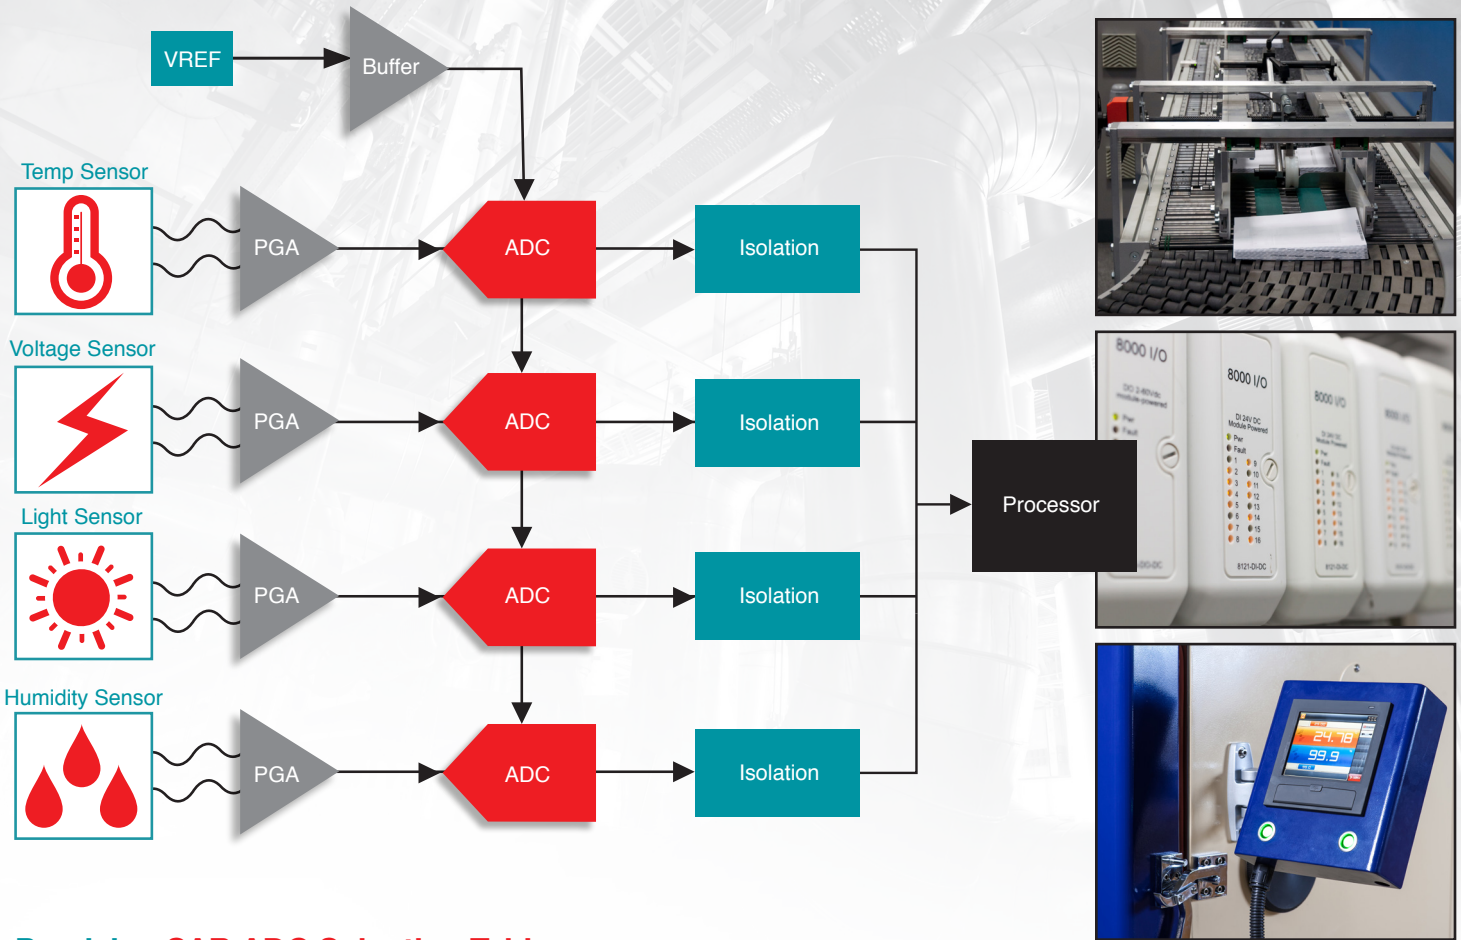

Why TI?

To meet the need for highly-integrated and precise yet fast factory control systems, Texas Instruments has developed a wide portfolio of successive approximation register analog-to-digital converters (SAR ADCs). With robust devices offering resolution up to 18 bits, 16 channels, wide input ranges and high temperature operation, TI has a SAR ADC to digitize today's world.

Typical PLC Data Acquisition System

Precision SAR ADC Selection Table

Device	Resolution (Bits)	Sample Rate (kSPS)	No. of Input Channels	Input Voltage (V)	Interface	Companion Drivers	Companion References + Buffers	Package
ADS8688	16	500	8	-10.24 to 10.24	Serial SPI	OPA2209	REF5040 + OPA376	TSSOP (38): 9.7 mm x 4.4 mm
ADS8353	16	500	2	0 to 5.5	Serial SPI	OPA836, THS4032	REF5025 + OPA2350	WQFN (16): 3 mm x 3 mm
ADS8881	18	1000	1	0 to 5	Serial SPI	OPA350, THS4521, OPA333	REF5045 + OPA333	VSSOP (10): 3 mm x 3 mm, VSON (10): 3 mm x 3 mm
ADS8331	16	2	4	0 to 5.5	Serial SPI	OPA211	REF5045 + THS4281	QFN (24): 4 mm x 4mm, TSSOP (24) 9.7 mm x 4.4 mm
ADS8319	16	2	1	0 to 5.5	Serial SPI	OPA211, THS4031	REF3030 + OPA313	MSOP (10): 3 mm x 3 mm, SON (10): 3 mm x 3 mm
ADS7042	12	1000	1	0 to 3.6	Serial SPI	OPA314	REF3333	8X2QFN: 1.5 mm x 1.5 mm, 8VSSOP: 2.3 mm x 2 mm

IMPORTANT NOTICE

Texas Instruments Incorporated and its subsidiaries (TI) reserve the right to make corrections, enhancements, improvements and other changes to its semiconductor products and services per JESD46, latest issue, and to discontinue any product or service per JESD48, latest issue. Buyers should obtain the latest relevant information before placing orders and should verify that such information is current and complete. All semiconductor products (also referred to herein as "components") are sold subject to TI's terms and conditions of sale supplied at the time of order acknowledgment.

TI warrants performance of its components to the specifications applicable at the time of sale, in accordance with the warranty in TI's terms and conditions of sale of semiconductor products. Testing and other quality control techniques are used to the extent TI deems necessary to support this warranty. Except where mandated by applicable law, testing of all parameters of each component is not necessarily performed.

TI assumes no liability for applications assistance or the design of Buyers' products. Buyers are responsible for their products and applications using TI components. To minimize the risks associated with Buyers' products and applications, Buyers should provide adequate design and operating safeguards.

TI does not warrant or represent that any license, either express or implied, is granted under any patent right, copyright, mask work right, or other intellectual property right relating to any combination, machine, or process in which TI components or services are used. Information published by TI regarding third-party products or services does not constitute a license to use such products or services or a warranty or endorsement thereof. Use of such information may require a license from a third party under the patents or other intellectual property of the third party, or a license from TI under the patents or other intellectual property of TI.

Reproduction of significant portions of TI information in TI data books or data sheets is permissible only if reproduction is without alteration and is accompanied by all associated warranties, conditions, limitations, and notices. TI is not responsible or liable for such altered documentation. Information of third parties may be subject to additional restrictions.

Resale of TI components or services with statements different from or beyond the parameters stated by TI for that component or service voids all express and any implied warranties for the associated TI component or service and is an unfair and deceptive business practice. TI is not responsible or liable for any such statements.

Buyer acknowledges and agrees that it is solely responsible for compliance with all legal, regulatory and safety-related requirements concerning its products, and any use of TI components in its applications, notwithstanding any applications-related information or support that may be provided by TI. Buyer represents and agrees that it has all the necessary expertise to create and implement safeguards which anticipate dangerous consequences of failures, monitor failures and their consequences, lessen the likelihood of failures that might cause harm and take appropriate remedial actions. Buyer will fully indemnify TI and its representatives against any damages arising out of the use of any TI components in safety-critical applications.

In some cases, TI components may be promoted specifically to facilitate safety-related applications. With such components, TI's goal is to help enable customers to design and create their own end-product solutions that meet applicable functional safety standards and requirements. Nonetheless, such components are subject to these terms.

No TI components are authorized for use in FDA Class III (or similar life-critical medical equipment) unless authorized officers of the parties have executed a special agreement specifically governing such use.

Only those TI components which TI has specifically designated as military grade or "enhanced plastic" are designed and intended for use in military/aerospace applications or environments. Buyer acknowledges and agrees that any military or aerospace use of TI components which have **not** been so designated is solely at the Buyer's risk, and that Buyer is solely responsible for compliance with all legal and regulatory requirements in connection with such use.

TI has specifically designated certain components as meeting ISO/TS16949 requirements, mainly for automotive use. In any case of use of non-designated products, TI will not be responsible for any failure to meet ISO/TS16949.
